

ATTACHMENT B

REMARKS

In the Official Action, the claims were considered in condition for allowance, and the only objection was on the basis of compliance with the sequence listing requirements. By virtue of the present amendment, which provides a revised sequence listing including all sequences in the application, and amendments to the specification whereby all sequence identifiers are added, Applicants submit that this case has now been placed in condition for allowance. Such action is earnestly solicited.

Should there be any remaining minor corrections necessary, the Examiner is requested to telephone the undersigned to expedite any additional corrections to the specification.
